

Dear members of the FCC.I am writing to ask you to please reject NAB's petition 04-160 and to back XM Satellite in providing an essential and refreshing service to it's subscribers.

I moved to America from England four years ago and I really missed the informative and entertaining radio that the BBC provided. I soon realised that most American radio is bland and non-innovative.

That is the reason that I bought XM about three years ago. It is truly wonderful and features articles, music and information that I can find no where else.

Thank you for your time and although I respect NAB's thoughts, I urge you to support an alternative choice...after all, freedom of choice is what the U.S. is all about...isn't it?

Many thanks
Simon Jacobs
